SEL Systems and Services Division Is Now SEL Engineering Services

PULLMAN, WA — April 21, 2008 — Schweitzer Engineering Laboratories, Inc. (SEL) today announced that the SEL Systems and Services Division is changing its name to SEL Engineering Services effective immediately.

The new name establishes a clear link to the division's core business and emphasizes its purpose. SEL is committed to expanding and increasing its engineering services operations, with locations currently in Pullman, Washington; Charlotte, North Carolina; Houston, Texas; and St. Louis, Missouri.

SEL Engineering Services is comprised of engineers with field experience who provide top-quality engineered systems and consulting services for electric utility and industrial power systems worldwide. SEL Engineering Services supports the application and operation of SEL equipment and other intelligent electronic devices (IEDs) applied on electric power systems. SEL fills a growing need in the electric power industry as companies deal with the impacts of smaller engineering staffs and increasingly complex protection, automation, and control requirements.

For more information on SEL Engineering Services, visit www.selinc.com/p90.

SEL serves the electric power industry worldwide through the design, manufacture, supply, and support of products and services for power system protection, monitoring, control, automation, and metering. SEL offers unmatched local technical support, a worldwide, ten-year product warranty, and a commitment to making electric power safer, more reliable, and more economical.
